

COMBINED SOLUTIONS FOR INDUSTRY

Carpi, May 31<sup>st</sup> 2019

## **NCS Company | PRESS RELEASE**

### **Schedoni, the Italian luxury leather goods icon for automotive chooses NCS Company**

Schedoni, the historical Italian company based in Modena, produces authentic luggage jewellery for almost 140 years.

Now, thanks to the agreement signed between Marcello Fantuzzi, Technical Director & President of NCS and Simone Schedoni, fourth generation of the family at the head of SCHEDONI, NCS enters the world of Luxury.

Schedoni is the first company in the world to invent "luxury luggage for the automotive industry".

This is a story that begins in 1977 from the cooperation with Ferrari Automobili: since then, a customized set of suitcases has been dedicated to each car model to optimize the spaces in the trunk.

It is a story that continues today with completely handmade coatings made of refined leathers, the bespoke suitcase developed for the best Italian and British automakers.

Unique objects that combine the leather of the car interiors with technological materials such as carbon fiber, titanium, aluminum machined by numerical control.

NCS has been chosen to enrich these products: complex metal details and components are produced in Carpi by the expert hands of the company's team, which since 2003 has been the point of reference in Italy - and not only - in the automotive sector for which the company produces aesthetic and functional prototypes thanks to one of the largest fleets of machines for additive manufacturing in Europe.

NCS and Schedoni share the same passion for their work, the ongoing search for new solutions and materials, the desire to combine tenacity and "know-how" that leads the two companies in the province of Modena to stand out in their sectors: points in common that have created a new and important collaboration.

A prestigious partnership which makes NCS fly all around the world, and which honors Emilia Romagna: land of passion, land of engines, work and dedication to create unique "Made in Italy", innovative and durable products.

**Schedoni & NCS, Together  
Quality as a starting point  
From Modena.**
